About Secondary

Secondary deals refer to transactions involving the resale of existing assets or investments, rather than the purchase of something brand new or directly from the original source.

Here’s how it applies in different contexts:

Real Estate:

A secondary deal means buying a property from a current owner or investor, instead of purchasing directly from a developer (which would be a primary deal). These deals often involve ready or rented units, sometimes at market value or below, depending on timing and motivation of the seller.

General Definition:

A secondary deal is a transaction on an existing or pre-owned asset, rather than a first-hand purchase directly from the original issuer or creator.
